

## *Calculated Frequency Acu-Therapy (CFT)*

It is a comfortable non-invasive treatment. While lying quietly on a mat the precise calculated frequency for your illness is pulsed into your body to stimulate healing. No needles are involved. Think of the **Calculated Frequency Acu-Therapy** as a battery recharger for the human cell. We now know that the voltage of a healthy cell is about 70-110 millivolts and when we get sick that voltage drops below 50 millivolts or less and cancer cells are 30 millivolts or less.

Calculated frequency acu-therapy (CFT) acts like a catalyst for the human cells to heal by providing frequencies that are critical for healthy metabolism. Different frequencies, wave forms and strengths treat different diseases This technique works especially well for bone tissue diseases, such as degenerating discs, joint disease, fractures, osteoporosis, and spondylosis. It also works very well for wound healing.

CFT improves microcirculation, oxygenation (up to a 200% increase), nerve regeneration, pain management and many other health promoting functions. There are over 1000 clinical studies and over 7000 research papers validating the therapeutic benefits of this treatment.

It is helpful to drink water before and after a treatment and just like any treatment you may be a bit sore the next day. A hot bath in epsom salts and drinking more water is helpful. Unfortunately, this treatment is not available to anyone with a pacemaker.
