## Hyperbaric O<sub>2</sub> Center

### Hyperbaric Oxygen Therapy available at Wausau's Acupuncture & Pain Treatment Center

#### Oxygenate your way to health and vitality

Treatments with Hyperbaric oxygen therapy (HBOT) provide a safe, highly effective method for delivering and increasing the oxygen levels to all body systems. Increasing oxygen helps to eliminate harmful toxic substances, stimulate capillary growth, and repair damaged areas of the body.

In our lie-down, clear, single person chamber, your whole body is pressurized two to three times the normal pressure while breathing 100% pure oxygen. This saturates your deprived tissue, blood and fluids with 20 times more than the normal concentration (high enough to sustain life with no blood at all.)

As we age, we lose vital capacity and the ability to effectively obtain adequate oxygen. Some disease conditions impair oxygen utilization. Injuries, infections, or diseases can cause a drop in this tissue oxygen level down to almost zero, destroying tissue and slowing healing.

*“My doctor said the surgical wounds in my hand are healing 10 weeks ahead of schedule, the normal color returned after the first treatment.” A.W.*

90% of the body's life energy is  
created by oxygen

#### HBOT has been scientifically proven to:

Increase white blood cell action and germ killing antibiotics, turning them from ordinary scavengers into efficient warriors. These defender cells use oxygen as the ammunition to kill pathogens. Can you imagine twenty times the normal ammunition supply?

Stimulate the growth of new blood vessels; help arterial damage and increase blood vessel diameter. This helps increase circulation and healing.

Increase by eight-fold the number of circulating stem cells throughout the body. Stem cells play an essential role in the repair and recovery of injured and diseased tissue.

Help the body utilize oxygen better, promote healing and improve health, fitness, stamina and endurance. It helps reverse the physical and psychological effects of oxygen deprivation from disease, injury, air and water pollution and aging.

The effects are cumulative. As you have more treatments, the body begins to function more efficiently as it restores its oxygen balance closer to your natural state. Relax and heal with safe, reliable oxygen...

#### Promote healing & Help your body utilize oxygen better

*“My mom had hit a plateau in her stroke recovery. They stopped therapy. Now with HBOT she is improving so quickly the P.T. and O.T. 60 day program was completed in less than 2 weeks. She is now walking” A. S.*

***Some of the most common conditions treated with hyperbaric therapy:***

- |                                    |                            |
|------------------------------------|----------------------------|
| Acute arthritis                    | Health & beauty            |
| Acute paralysis                    | Intracranial abscesses     |
| Arterial gas embolism              | Lymes disease              |
| Autism                             | Memory loss                |
| Bone infections                    | Migraines                  |
| Brain injuries                     | Multiple sclerosis         |
| Brown recluse spider bite          | Neuropathy                 |
| Carbon monoxide poisoning          | Non-healing tissue         |
| Cellulitis                         | Parkinson's                |
| Coma                               | Post-surgical healing      |
| Compromised skin grafts            | Radiation damage           |
| Crush injury, compartment syndrome | Stroke                     |
| Decompression sickness (bends)     | Sudden deafness            |
| Diabetic wounds                    | Tendon & ligament injuries |
| Eye problems                       | Trigeminal neuralgia       |
| Fibromyalgia                       | And many more              |

*“My knee replacement recovery went so fast with having HBOT after the surgery. My friends say I also look years younger” V.S.*

While you are having your treatment you can sleep, watch a movie or T.V., listen to an audio book, or music. while you lay comfortably in our clear single person chamber

The number of treatments you will require varies between patients. It depends upon your particular problem, its severity and duration. Some people may only require two treatments, while others, such as those with severe neurological conditions will require eighty treatments or more.

It is best to attend treatments daily since the effects are cumulative. We offer chamber treatments Monday - Thursday. The duration of each treatment is between 1.5 and 2 hours.

Most conditions are not covered by insurance.
